SURDIAL™ DX

Experience the Difference

NIPRO

SURDIAL™ DX

The SURDIAL™ DX Hemodialysis System was inspired by clinical needs, patient comfort, and operational efficiency. Its innovative design takes both the patient and clinician experience to a different level.

Learn how these features make all the difference.

Patient Safety

Clinical Benefits

Patient Experience

Efficiency

Clinical Differentiation

Refined clinical workflow to allow ample time for patient care.

Clinical Differentiators

- Automatic blood pump segment loading
- Ability to setup during startup test
- Auto priming function
- Estimated and measured Kt/V values
- Ergonomic design with rotatable monitor
- Large wheels for ease of maneuverability

Efficiency

Offers seamless and streamlined user processes.

Process Efficiency Benefits

- Streamlined, automated time saving processes
- Intuitive, on-screen guidance to minimize human error
- Reduced preparation and disinfection time
- Efficient, low disinfectant consumption
- Automatic, programable system wake-up function
- Confidence-building continuous professional training
- Compact, space-saving design

Patient Experience

Takes patient comfort to the next level.

Patient-Driven Features

- Quiet running system operation
- Soft, patient-friendly alarm sound
- Adjustable cuff inflation pressure
- Treatment progress display

Patient Safety

Engineered with patient safety in mind.

Patient Safety Features

- Built in safety monitoring systems
- Aseptic priming to built-in drain port
- Maximum set blood flow rate for rinse-back
- Front and internal leakage detector
- Venous/arterial pressure monitoring
